

FOR IMMEDIATE RELEASE

# Jason Carroll Holloway Launches the Masters X Trilogy

*A conspiracy of frequency, medieval manuscripts, and the city beneath the city — three novels and a complete omnibus from Seventh City Press.*

**KANSAS CITY, MO** — Author Jason Carroll Holloway and his independent imprint Seventh City Press have released the **Masters X Trilogy**, a three-volume work of literary conspiracy fiction. The trilogy — *The Inheritance of Frequency*, *The Grimoire*, and *The Kingdom* — is available in hardcover, paperback, and ebook, alongside a complete one-volume omnibus.

The story begins beneath Kansas City. A fired security guard named Blake Masters inherits a safety deposit box his grandfather paid for fifty-seven years in advance, timed to open at the exact moment Blake would be ready for it. Inside: seven notebooks, thirty years of classified acoustic research, and a cross-reference to a crypt that has been sealed beneath Prague since 1267. The trilogy is the account of what Blake does with that knowledge — and what it does to him.

The series braids documented history into fiction: the undeciphered Voynich Manuscript and the medieval Ars Notoria; the science of archaeoacoustics and a 111.2 Hz frequency that recurs in caves and cathedrals across four continents; and the real, subterranean geography of Kansas City, from the SubTropolis cavern complex upward. Every location in the novels can be visited, looked up, or found in a scholarly bibliography — and much of the underlying data is published openly through the Analysis Chamber, a research archive on the author's website that runs the same measurements the characters run in the books.

*"What the medieval masters encoded in cathedral geometry and grimoire tradition wasn't mysticism — it was a technology we had simply forgotten how to read. The Masters X Trilogy is the account of learning to read it again."*

— JASON CARROLL HOLLOWAY

*For readers of Eco's *Foucault's Pendulum*, Brown's *The Da Vinci Code*, Kostova's *The Historian*, and Doerr's *Cloud Cuckoo Land*.*

## THE BOOKS

### **VOL. I** The Inheritance of Frequency

Seven notebooks. Thirty years of classified acoustic research. A sealed crypt beneath Prague.

### **VOL. II** The Grimoire

The Ars Notoria decoded. A preparation protocol for the frequency. Twenty-three candidates waiting.

### **VOL. III** The Kingdom

The demonstration and the argument — and, within the novel's own events, an open-source release that reaches 1.2 million downloads.

### **OMNIBUS** The Masters X Trilogy, Complete

All three novels in a single volume, in hardcover and paperback.

## AVAILABILITY

Hardcover, paperback, and ebook. Distributed globally through IngramSpark and available via Amazon, Bookshop.org, and library systems (OverDrive, Baker & Taylor). Ebook editions from \$5.99. Full ISBNs, page counts, pricing by market, and BISAC subject codes appear on the accompanying Fact Sheet.

## ABOUT THE AUTHOR

Jason Carroll Holloway is a writer and researcher based in Kansas City and the founder of Seventh City Press. His work explores the intersection of acoustic science, medieval scholarship, and human consciousness. He holds an M.A. in English Literature from Mercy University in Dobbs Ferry, New York, along with degrees and certificates in psychology, sociology, creative writing, and data analytics. He lives and writes in Kansas City.

## ABOUT SEVENTH CITY PRESS

Seventh City Press is an independent literary imprint founded by Jason Carroll Holloway to publish work that refuses the division between imaginative and intellectual work — novels that think, and criticism that speaks. The name comes from the seven cities of the Aldric tradition in the Masters X Trilogy.

ISBN matrix verified against IngramSpark records (Jul 2026). Paperback and ebook editions are live. Hardcover editions pending; omnibus editions pending approval. Omnibus page counts: PB 731pp, HC 674pp (pending confirmation of final interior).

## EDITIONS & SPECIFICATIONS

|                      |                             |                 |                                |
|----------------------|-----------------------------|-----------------|--------------------------------|
| Ebook price          | \$5.99–\$6.99 (per title)   | Omnibus PB trim | 6.14 × 9.21 in (Royal 8vo)     |
| Genre                | Literary conspiracy fiction | Omnibus HC trim | 6.14 × 9.21 in · digital cloth |
| Interior stock       | 50# cream                   | Publisher       | Seventh City Press             |
| Print & distribution | IngramSpark (global)        | Ebook / Kindle  | Amazon KDP                     |

## BISAC SUBJECT CODES

|                                    |           |
|------------------------------------|-----------|
| 1 · Fiction / Thrillers / Suspense | FIC030000 |
| 2 · Fiction / Literary             | FIC019000 |
| 3 · Fiction / Historical / General | FIC014000 |

BISAC codes confirmed from IngramSpark title records. Applied consistently across all three volumes and both omnibus editions.

## CHANNELS & TRADE TERMS

Amazon · Bookshop.org · IngramSpark global catalog (40,000+ retail & library accounts) · library systems via OverDrive and Baker & Taylor. Wholesale discount 55%, returns accepted. Research companion: the Analysis Chamber archive at jasoncholloway.com.

## OUTSTANDING ITEMS — FOR AGENT COMPLETION

The following items require data that was not available at press kit generation. Supply these to complete the fact sheet before distribution. See the accompanying Agent Prompt document for full context and step-by-step instructions.

|                             |                                                                    |
|-----------------------------|--------------------------------------------------------------------|
| Hardcover page counts       | Awaiting HC approval — run pdfinfo on final HC interiors           |
| Omnibus final page counts   | Confirm against final approved interior PDFs                       |
| Omnibus distribution status | Update "pending" to "live" once IngramSpark approves               |
| Monograph BISAC codes       | LIT004020 / LIT007000 / LIT006000 — confirm current on IngramSpark |
| Author headshot credit line | Supply photographer name / year if press kit includes photo        |

## Jason Carroll Holloway

*Writer and researcher at the intersection of acoustic science, medieval scholarship, and human consciousness.*

---

### ONE LINE

Jason Carroll Holloway is a Kansas City writer and researcher and the founder of Seventh City Press, author of the Masters X Trilogy.

---

### SHORT — ~50 WORDS

Jason Carroll Holloway is a writer and researcher based in Kansas City and the founder of Seventh City Press. His work explores the intersection of acoustic science, medieval scholarship, and human consciousness. He is the author of the Masters X Trilogy — *The Inheritance of Frequency*, *The Grimoire*, and *The Kingdom*.

---

### STANDARD — ~100 WORDS

Jason Carroll Holloway is a writer and researcher based in Kansas City and the founder of Seventh City Press. His work explores the intersection of acoustic science, medieval scholarship, and human consciousness — a set of preoccupations that runs through the Masters X Trilogy, his three-volume work of literary conspiracy fiction. He holds an M.A. in English Literature from Mercy University in Dobbs Ferry, New York, along with degrees and certificates in psychology, sociology, creative writing, and data analytics. Alongside the novels he maintains the Analysis Chamber, an open research archive that publishes the same acoustic measurements his characters run in the books. He lives and writes in Kansas City.

---

### EXTENDED — ~180 WORDS

Jason Carroll Holloway is a writer and researcher based in Kansas City and the founder of Seventh City Press, the independent imprint behind his Masters X Trilogy. His work refuses the usual border between imaginative and intellectual writing: novels built on real archaeoacoustics research, medieval manuscript scholarship, and the documented subterranean geography of his own city.

The trilogy — *The Inheritance of Frequency*, *The Grimoire*, and *The Kingdom* — braids the undeciphered Voynich Manuscript, the medieval Ars Notoria, and a recurring 111.2 Hz frequency into a conspiracy that begins beneath Kansas City and reaches a crypt sealed under Prague since 1267. Much of the science underpinning the fiction is published openly through the Analysis Chamber, a research archive on his website.

Holloway holds an M.A. in English Literature from Mercy University in Dobbs Ferry, New York, along with degrees and certificates in psychology, sociology, creative writing, and data analytics. He has also written scholarly criticism, including a monograph on the novelist John Hawkes. He lives and writes in Kansas City.

---

### BOILERPLATE — SEVENTH CITY PRESS

Seventh City Press is an independent literary imprint founded by Jason Carroll Holloway to publish work that refuses the division between imaginative and intellectual work — novels that think, and criticism that speaks. The name comes from the seven cities of the Aldric tradition in the Masters X Trilogy.

## SERIES OVERVIEW & BOOK-BY-BOOK SYNOPSES

# The Masters X Trilogy

### THE PREMISE

Beneath Kansas City, a fired security guard named Blake Masters inherits a safety deposit box his grandfather paid for fifty-seven years in advance — timed to open at the exact moment Blake would be ready for it. Inside: seven notebooks, thirty years of classified acoustic research, and a cross-reference to a crypt sealed beneath Prague since 1267. The trilogy is the account of what Blake does with that knowledge, and what it does to him.

The series braids documented history into fiction — the undeciphered Voynich Manuscript, the medieval Ars Notoria, the science of archaeoacoustics, and a 111.2 Hz frequency that recurs in caves and cathedrals across four continents — against the real subterranean geography of Kansas City, from the SubTropolis cavern complex upward. Every location can be visited or found in a scholarly bibliography.

### VOLUME I — THE INHERITANCE OF FREQUENCY

Seven notebooks. Thirty years of classified acoustic research. A sealed crypt beneath Prague. Blake Masters opens the box that was left for him and finds a body of work that shouldn't exist — measurements taken in places no researcher should have reached, all circling one recurring signal. The first volume is the descent: how an ordinary man comes to believe the impossible thing his grandfather spent a lifetime documenting, and decides to follow it underground.

### VOLUME II — THE GRIMOIRE

The Ars Notoria decoded. A preparation protocol for the frequency. Twenty-three candidates waiting. In the second volume, the research stops being a mystery to solve and becomes an instruction to carry out. What the medieval masters wrote down as ritual reveals itself as method — and Blake learns that a protocol is only as safe as the people willing to run it.

### VOLUME III — THE KINGDOM

The demonstration. The argument. The open-source release. The final volume brings the work into the open — a proof staged for the world, an argument for what the frequency means, and, within the novel's own events, a release that reaches 1.2 million downloads before anyone can decide whether it should have. The Kingdom is about what happens when a secret becomes a public fact.

### THE SEVEN CITIES

The imprint takes its name from the seven cities of the Aldric tradition in the trilogy — **Prague, Paris, Rome, Constantinople, Toledo, Uppsala**, and the unnamed seventh: the city where the frequency was first heard. A press named for a threshold.

### COMPARABLE TITLES

*Umberto Eco, Foucault's Pendulum · Dan Brown, The Da Vinci Code · Elizabeth Kostova, The Historian · Anthony Doerr, Cloud Cuckoo Land*

### THE RESEARCH LAYER

Much of the science underpinning the fiction is published openly through the **Analysis Chamber**, a research archive on the author's website that runs the same acoustic measurements the characters run in the books — the trilogy's field notes, made available to any reader who wants to check the work.

AGENT PROMPT — INTERNAL USE ONLY

## Press Kit Completion Instructions

*For use when hardcovers and omnibus editions clear IngramSpark approval*

### CONTEXT FOR THE AGENT

This document accompanies a Seventh City Press media kit comprising four PDFs: the press release, fact sheet, author bios, and series synopses. The kit was generated in July 2026 from an IngramSpark metadata export ( `metadata_report.csv` ) and the verified ISBN matrix. At the time of generation, three items were outstanding: hardcover editions were pending IngramSpark approval, both omnibus editions were in revision, and the page counts for the HC interiors needed verification against final interior PDFs. When those items resolve, use this document to update the kit.

### WHAT TO DO WHEN HARDCOVERS CLEAR

- Export a fresh metadata report from IngramSpark.** Log into your IngramSpark account → Title Management → Export Metadata. Save as `metadata_report_v2.csv` and upload it alongside this prompt.
- Verify the hardcover page counts against the final interior PDFs.** Run `pdinfo <interior_file>.pdf` in your terminal for each HC interior. The figures in the current fact sheet are placeholders sourced from the PB page counts. The HC interiors differ due to layout and trim size.
- Supply the following fields to complete the fact sheet** — these are the only items marked as pending or needing confirmation in the current kit files:

|                                 |                                                                     |
|---------------------------------|---------------------------------------------------------------------|
| The Inheritance of Frequency HC | _____ pp                                                            |
| The Grimoire HC                 | _____ pp                                                            |
| The Kingdom HC                  | _____ pp (currently uses 200pp as placeholder — confirm)            |
| Masters X: Complete Trilogy PB  | 731pp — confirm matches final approved interior                     |
| Masters X: Complete Trilogy HC  | 674pp — confirm matches final approved interior                     |
| Omnibus PB status               | <i>change "pending" to "Available" once live</i>                    |
| Omnibus HC status               | <i>change "pending" to "Available" once live</i>                    |
| Author headshot credit          | <i>Photographer name / year (if press kit will include a photo)</i> |

### WHAT TO DO WHEN OMNIBUS EDITIONS CLEAR

- Update the omnibus series number** in IngramSpark from "1" to "0" on both the PB and HC records. This prevents retail catalog systems from displaying two "Book 1" entries in the Masters X series. Verify this change appears in the refreshed metadata export.
- Confirm the omnibus Canadian price** on the PB. Currently the PB shows US \$36.99 / CA \$36.99 (no Canadian premium). All three individual PBs carry CA premiums. Consider setting the omnibus PB CA price to \$44.99–\$46.99 before it goes live.
- Update the press release** to change "alongside a complete one-volume omnibus" from future-tense framing to a confirmed live statement once both omnibus editions are available for order.

### THE PROMPT

COPY THIS PROMPT AND PASTE IT — ALONG WITH THE REFRESHED METADATA CSV — TO CONTINUE THIS WORK:

I am Jason Carroll Holloway of Seventh City Press. Attached is a refreshed IngramSpark metadata export ( `metadata_report_v2.csv` ) for the Masters X Trilogy and Hawkes Monograph catalog. I also have a press kit built in July 2026 that contains one or more items marked as "pending" — specifically hardcover page counts and omnibus distribution status. Please: (1) cross-reference the new CSV against the verified ISBN matrix in your memory (all ISBNs and formats are documented in prior sessions), (2) identify which pending items are now resolved, (3) supply the confirmed page counts and status updates for each title, and (4) regenerate the updated press kit PDFs — press release, fact sheet, bios, and synopses — with all confirmed data filled in and all "pending" or "confirm" markers cleared. Flag any new discrepancies you find in the refreshed export before regenerating. The kit files are at `/home/claude/kit/` and the render pipeline uses `render.py` with Playwright.
